

Installing Your EARTHLINK SOFTWARE

Install our **FREE TotalAccess** software now to get the most from your EarthLink service

What You Get with TotalAccess

Install our free software to get the EarthLink Task Panel, Toolbar, and more. It's all you need to take advantage of all our protection and performance features.

Features

EarthLink Toolbar®

- ▶ Pop-Up Blocker
- ▶ Privacy Tools

Protection Control Center

- ▶ AntiVirus and Spyware Blocker
- ▶ Firewall

Accelerator (for Dial-Up only)

Where to get TotalAccess software

- ▶ **Install** the CD included in your Welcome Kit
- ▶ **Download** the software at: www.earthlink.net/totalaccess
- ▶ **Request** a free CD at: www.earthlink.net/software/free/totalaccess/order

Installation tips

- ▶ Close all open programs.
- ▶ When asked if you have an EarthLink email address, be sure to click Yes and enter the address provided in the letter in your Welcome Kit.
- ▶ Be sure to select our **FREE** Protection Control Center during installation.
- ▶ **Dial-Up users:** choose two or more access numbers if available.

How to connect to the Internet

1. Double-click the EarthLink TotalAccess shortcut on your desktop (see Figure 1).
2. On the *Sign-In* screen, select the proper *Profile* and *Connection*, and enter your password—if it isn't already saved (see Figure 2).
3. Click *Connect*.

Quick tips for a better online experience

- ▶ **Update your software regularly.** TotalAccess will automatically notify you when updates are available. Click on the notice to get the latest update. You can also click the Task Panel's *Toolbox* button and select *Check for Updates* at any time.
- ▶ **Choose your options and preferences** with the Task Panel (see pages 6–7 for details).
- ▶ **Dial-Up users:** maximize your speed. Adjust your Accelerator preferences from the EarthLink Toolbar on your Web browser (see insert for details).
- ▶ **If you are upgrading to High Speed from Dial-Up,** remember to change your connection settings.
